

## innogy celebrates ground breaking at Glen Noe hydro scheme

- **Construction started May 2019**
- **£2,000 annual community fund announced**

Perth, 19 June 2019

Consented by Argyll & Bute Council in September 2016, innogy's 2MW Glen Noe Hydro Scheme, located within the Glen Noe Estate, near Loch Etive in the west of Scotland, is now under construction. Work on site started in May with the construction of access tracks heading up towards the intakes.

The run-of-river scheme consists of three intakes, approximately 2.8 km of buried pipeline and a powerhouse with tailrace. When completed, the scheme will have the capacity to provide sufficient renewable electricity to power up to 1,436\* average homes each year. Completion is anticipated to be by end 2020.

Duncan Morrison, Hydro UK Development & Projects Manager, said: "We are pleased that the construction of Glen Noe is underway and I'm delighted to announce that innogy will be making a community fund of £2,000 per year, available for up to 40 years.

"Hydro has proved its longevity in the renewables business and so the construction of a further hydro scheme will play a crucial role in enabling Scotland to fulfil and maintain its clean energy future ambition to reach net zero carbon by 2045."

- Further information about Glen Noe hydro scheme can be found at [www.innogy.com/glen-noe](http://www.innogy.com/glen-noe)

\*Equivalent homes supplied is based on an annual electricity consumption per home of 4100 kWh. This figure is supported by recent domestic electricity consumption data available from The Digest of UK Energy Statistics and household figures from the UK Statistics Authority.

### **About innogy SE**

innogy SE is a leading German energy company, with revenue of around €37 billion (2018) and around 43,000 employees. With its three business segments Renewables, Grid & Infrastructure and Retail, innogy addresses the requirements of a modern, decarbonised, decentralised and digital energy world. Its activities focus on its about 22 million customers, and on offering them innovative and sustainable products and services which enable them to use energy more efficiently and improve their quality of life. The key markets are Germany, the United Kingdom, the Netherlands and Belgium, as well as several countries in Central Eastern and South Eastern Europe, especially the Czech Republic, Hungary and Poland. In renewable power generation, the company is also active in other regions, e.g. Spain, Italy and the USA, with a total capacity of 4.0 gigawatts. As a leader of innovation in future-oriented fields like eMobility, we are represented in the international hot-spots of the technology industry such as Silicon Valley, Tel Aviv and Berlin. We combine the extensive expertise of our energy technicians and engineers with digital technology partners, from start-ups to major corporates.
